BRADLEY K. TRACY

614-230-7914 | bradktracy@gmail.com
Baltimore, Ohio 43105

I am currently a software engineer with the Chase auto finance team building out a testing framework and script coverage for a desktop application. During the process of creating the testing framework, I have focused on leveling up in software architecture and design patterns, as well as my understanding of the SDLC at an enterprise level. Outside of work I am learning about Docker, Kafka and functional programming with JavaScript.

EDUCATION
